

An aerial photograph of a suburban community. In the foreground, a red metal truss bridge spans a body of water. The bridge has decorative circular emblems on its side. Beyond the bridge, a large lake reflects the sky. On the opposite shore, there is a residential development with many houses, some with blue roofs. A winding road and a path with trees are visible between the lake and the houses. The sky is blue with some clouds. A large, faint circular logo with a stylized 'B' is in the top right corner.

Welcome to a New Kind of Hometown

COMMUNITY GUIDE

BABCOCK RANCH

Live a better life

Born From a Love Affair with the Land

The landscape and habitat inspired a vision to create a place that embraces community, technology and the environment like never before. What was once just 18,000 acres of land is now a ground-breaking town with sustainability built into its infrastructure. Our eight core initiatives continue to guide our decisions at every stage of development, and Babcock Ranch has become an innovative, open and welcoming hometown for everyone.

FUN

SOMETHING FOR EVERYONE

As the country's first solar-powered town rooted in sustainability, we're drawing the blueprint for the hometown of tomorrow. A place where community, technology, and nature come together to create a place unlike anywhere else in the world. From nature trails and healthcare, to energy-efficient homes and excellent schools, shopping, and dining within walking distance, Babcock Ranch provides everything you need to thrive.

And soon our next phase of development, Midtown, will come to life bringing new neighborhoods and new builders, a mixed-use village green spanning approximately 7-acres, and a 3.5-mile linear park unlike anything you've seen before. At build out, Babcock Ranch will offer up to 6 million square feet of retail and commercial, medical facilities, additional schools, hotel and office space, and 50+ miles of trails.

Like No Place Else

- The first greenfield master-planned "smart town" in the U.S.
- World's first town utilizing onsite solar generation to produce more clean, renewable energy than it consumes
- Powered by two photovoltaic solar energy facilities with a 10MW battery storage system includes of total of 650,000 solar panels laid out along 870 acres of land
- 50% of the land (9,000 acres) dedicated to natural greenways, parks and lakes
- 50,000+ residents upon build-out
- Surrounded by a 73,000-acre nature preserve
- Among the country's 50 top-selling master-planned communities of 2020 and 2021 by RCLCO and John Burns Real Estate Consulting

Bikeable Walkable Rowable

Babcock Ranch is an unparalleled destination for outdoor living, with 50+ miles of trails, an abundance of lakes, and dozens of parks at build out. Each day is a new adventure: bike looping trails, play soccer with friends, walk to the local fishing hole, and so much more.

50% of Babcock Ranch's footprint is set aside for green spaces designed to reflect our appreciation for and sensitivity to local ecologies, from native plant areas and wildlife to important hydrologic networks. As our story unfolds, we will incorporate stewardship, sustainability, and restoration as key features in our outdoor spaces designed for a healthier, happier lifestyle.

Have You Ever Seen a Park Within a Park?

Our next phase of development includes Curry Creek Park, a one-of-a-kind, three-and-a-half-mile linear park spanning a combined 50 acres. Made up of six parks interconnected by our trail system, planned amenities include:

- Themed play spaces
- Native plant trails
- Large event lawns for community-wide events
- Dog park
- Flex sports lawns

Preserving Our Wetlands

During construction, a weir system was introduced to restore historic waterways of the Curry Lake Preserve ecosystem.

AFTER REHYDRATING SURROUNDING WETLANDS:

Native vegetation thrived, reclaiming the land from invasive species

Crayfish returned to its waters, an important food source for local birds

Hosts of bird species returned and once again call Curry Lake home

Convenience 'Round Every Corner

Babcock Ranch has been thoughtfully designed to help residents live their best life. While we have hiking and biking paths, greenways, and lakes perfect for outdoor adventures, we also offer incredible conveniences right in our hometown.

Babcock Ranch is intentionally designed to offer multiple town centers so residents can enjoy a walkable lifestyle no matter where they live. Bike to work, walk to your favorite restaurant or even the doctor.

From trails to entertainment to healthcare, there's a million ways to enrich your life at Babcock Ranch.

Main Street Meets Modern Life

FOUNDER'S SQUARE

Home of Slater's Provisions, restaurants, the Hatchery co-work space, Food Truck Fridays, and countless community celebrations.

CRESCENT B COMMONS

A retail plaza with convenient shopping, services, dining experiences, and yes... a Publix!

MIDTOWN'S VILLAGE GREEN (COMING SOON)

Approximately 7-acres of sprawling green space surrounded by an incredible mix of offices, shopping, dining and more.

Best-in-Class Education

From Pre-K through high school, Babcock Ranch offers excellent schools minutes from home. Both Babcock Neighborhood School and Babcock High School offer a “greenSTEAM” education that integrates Science, Technology, Engineering, the Arts and Mathematics. Focusing on local landscape, history, culture, and context encourages students to explore the world around them. Additional schools will be added to our hometown to meet the growth of Babcock Ranch.

Opening in 2022 and built with sustainable materials, Babcock High School will offer students collegiate-level experiences, with facilities for agricultural and environmental science, computer and IT labs, a media lab for graphic design, a sound and video production studio, an art studio, a large robotics, laser, and 3-D printer lab.

Next door to Babcock High School sits the Field House, which is outfitted with sports courts, a cafeteria, and theater space. It will double as an emergency shelter and community event space.

Building a Community Through Technology

At Babcock Ranch, technology and nature work together to create a town that will thrive for generations to come. Our hometown is equipped with solar-powered renewable energy, energy-efficient homes, and fiber optic internet for a fully connected lifestyle.

PROUD TO BE AMERICA'S FIRST SOLAR-POWERED TOWN

Renewable energy is a way of life at Babcock Ranch. Producing renewable energy at a large scale empowers residents to minimize their environmental footprint at no additional cost. In partnership with Florida Power & Light Company, Babcock Ranch houses the FPL Babcock Ranch Solar Energy Center, FPL Babcock Preserve Solar Energy Center, and a battery storage system on 870 acres of land.

Each solar energy center can generate nearly 75 MW of clean energy, for a combined total of nearly 150 MW - which is equivalent to more than 650,000 solar panels and the ability to power approximately 30,000 homes. Babcock Ranch's 10 MW battery storage system was the largest in the nation when it was commissioned and stores power generated by the FPL Babcock Ranch Solar Energy Center, ensuring a steady supply of power on partly cloudy days and at night. The FPL Babcock Ranch Solar Energy Centers and battery storage system also ensure that the net production of clean, renewable energy at Babcock Ranch exceeds the total amount the town consumes.

IT'S EASY BUILDING GREEN

We're a certified Platinum "Florida Green" community by FGBC, the highest level available. All homes must receive a Bronze Standard of Certification or higher from the Florida Green Building Coalition.

We believe that innovative homes are healthier and can reduce the cost of home ownership. To test this hypothesis, Babcock Ranch opened Innovation Way in 2022. Comprised of seven homes in our Lake Timber neighborhood, Innovation Way serves as a living laboratory to explore the health, wellness and financial benefits of innovative, environmentally sustainable home construction. From intelligent heating and cooling systems to clean water technology and smart home integrations, this one-of-a-kind real-world platform allows our builders to experiment and develop new standards for all homes built in Babcock Ranch.

Did you Know?

Solar amenities are found throughout the community to encourage sustainable habits.

SOLAR TREES - Part technology, part public art, Babcock Ranch's solar trees serve as charging stations for handheld devices and act as a focal point for renewable energy education.

SOLAR CAR CHARGING STATIONS - Clean energy goes beyond what's powering homes and businesses. That's why we have installed electric vehicle (EV) charging stations throughout this community.

Where Fun is a Way of Life

Happiness is a key component to a healthy life, and it's important to have fun! Our Lakehouse and Cypress Lodge amenities provide one-of-a-kind experiences for Babcock Ranch residents, with modern pools, game lawns, playgrounds, and spectacular views of Lake Timber and Lake Babcock. Golf-loving residents of Babcock National can hit the links on their own spectacular 18-hole golf course designed by Gordon Lewis.

From Food Truck Fridays to farmers markets to the Babcock Ranch Art Show, there's always something to look forward to at Babcock Ranch. Our robust calendar of resident events, vibrant gathering spaces, nature trails, and waterways create experiences that make you want to stay longer and spend more time—it's a place you will never want to leave.

GET TO KNOW THE NEIGHBORHOOD (AND OUR BUILDERS)

Homes in Babcock Ranch offer a sustainable way of life and our vibrant neighborhoods each have their own distinct characteristics. Our next phase, Midtown, will offer more than a dozen new neighborhoods from several award-winning builders. From townhomes, villas, and condos, to single-family estates and active adult neighborhoods, we have countless options to help you find your perfect fit.

Our builders were carefully selected to bring our diverse neighborhoods to life with beautifully crafted, sustainability designed homes. Industry leaders offering a demonstrated commitment to excellence, and a shared desire to create an innovative, responsibly developed hometown that exists in harmony with our environment.
